Brilliant model pack with 'open everything' feature
(10 of 12 found this review helpful)

sicga123

I'm a big fan of Nekobolt's work and I especially like those model packs which have opening cupboards and drawers and doors. It is not that common to get that functionality which can be needed in a great many games.

A lot of assets are simply created just to be set dressing and have no use other than being solid clutter objects, so I appreciate models that can be used more interactively and Nekobolt's full kits never fail in this regard.

Easy and beautiful
(8 of 10 found this review helpful)

maximalniq

This is the first asset that I am buying. Plenty of models, beautiful and easy to work with them. The main thing that I am worried about is how it will perform on low spec PC`s.

I just tested the prefabs on mobile, and made a simple room the performance is awesome.

10/10 !!!

Excellent !
(5 of 7 found this review helpful)

Want to do some interior design but you just can't spend hours on modelling and texturing ? This assets pack is for you ! I just needed a few minutes to create an entire flat ! Awesome !
